**Australian Bureau of Statistics, 1976 Census : *Population and Dwellings : Cross-classified Tables* (2423.0)**

## PREFACE

Final results from the 1976 Census of Population and Housing are now being released in a series of bulletins covering single and cross-classified characteristics of population and dwellings.

This bulletin contains cross-classified data for Tasmania. Further cross-classified data will begin to be available from April 1979.

In an operation the size of the Census there are many ways for errors to find their way into the final results. As in other areas of statistics, much of the effort of statisticians is directed to devising procedures which prevent most errors from occurring or which detect and eliminate those which do occur. Despite such efforts, it is impracticable to eliminate every inaccuracy but special steps such as editing and quality control procedures are taken to measure and control the level of such inaccuracy. Thus while some minor errors and discrepancies may be evident in the final results, it is unlikely that they would have any practical significance in the interpretation of the Census data.

All census data are available on microfiche — see *Information Paper No. 3, Release of Data on Microfiche Supplement* (2106.0).

Small area summary data and complex cross-classified data are also available on magnetic tape — see *Information Paper No. 6, Release of Data on Magnetic Tape* (2105.0) and *Information Paper No. 8, Collection District and Local Government Area Summary Files on Magnetic Tape* (2111.0).

## EXPLANATORY NOTES

### Introduction

This bulletin is one of a series which show final data for characteristics of the population and dwellings in the States, Territories and Australia as enumerated at the Census of 30 June 1976. The 79 tables generally show detailed cross-classified data for characteristics of the population further classified, where appropriate, by sex.

Where possible the full classification of each characteristic has been used but in some cases space allowed only a condensed classification to be used.

To allow comparison between the total population and the overseas born population, some tables on the same characteristics have been included for both these groups.

Final results of the 1976 Census were processed on a sample basis and are therefore subject to sampling error. Examination of the final data has shown that the sampling error is not as large as previously estimated. Consequently graphs for estimating the Relative Standard Error have been revised and appear, along with detailed notes on sampling errors associated with census estimates, in Appendix B. Extra copies of these notes may be obtained by contacting one of the ABS offices listed in Appendix D. Data for the Northern Territory are not subject to sampling error because all the schedules were processed.

Because of the nature of the processing system, there are minor differences between data contained in this series of bulletins and preliminary data published in the series *Population and Dwellings in Local Government Areas and Urban Centres (Preliminary)* (2401.0 – 2408.0), *Characteristics of the Population in Local Government Areas (Preliminary)* (2201.0 – 2208.0) and *Characteristics of the Population: States, Territories and Australia (Preliminary)* (2209.0). The total number of people shown for each State and Territory corresponds with that published in *Census of Population and Housing, 30 June 1976* (2402.9), which shows the total enumerated population of each State and Territory. Where statistics have been rounded, any discrepancies between sums of the component items and totals are due to rounding.

### Scope

The 1976 Census of Population and Housing aimed at enumerating every person who spent Census night, 30 June 1976, in Australia, including people on vessels in or between Australian ports, on board long-distance trains, buses or aircraft, and every dwelling, whether occupied or unoccupied.

The Census was conducted on a *de facto* basis, i.e. people were enumerated where they were on census night, and this may not have been where they usually lived. *Visitors* to Australia were enumerated if they were in Australia on census night, regardless of how long ago they had arrived or how long they planned to stay. *Australian residents* out of the country on census night were excluded from the count.

*Diplomatic personnel* and their families are, by definition, out of scope of the census, as are diplomatic residences, including all people resident therein on census night. In 1976 there were 3,316 diplomatic personnel and their families resident in Australia. The number of diplomatic personnel and their families resident in each State and Territory for 1976 were as follows: New South Wales 723, Victoria 399, Queensland 59, South Australia 19, Western Australia 62, Australian Capital Territory 2,054.

### Coverage

As mentioned above, the census aims at enumerating every person and dwelling excluding diplomatic personnel and their residences, in Australia on Census night, 30 June 1976.

While every effort is made to minimise under-enumeration, some inevitably remains for various reasons (e.g. inadvertent omission of very young children, treatment by the collector of an occupied dwelling as unoccupied). Refusal by householders to complete the Census Schedule is not a significant cause of under-enumeration as estimates by the Collector are used in such cases.

The adjustment for under-enumeration, to the census figures "as recorded" is estimated to be 2.71 per cent for Australia as a whole, but the figure varies not only from State to State but also between areas within States. For the estimated degree of under-enumeration in each State and Territory, see *Population of States and Territories Adjusted for Under-enumeration as Shown by Post-enumeration Survey* (2212.0). The data contained in this bulletin and its companion tables are not adjusted for under-enumeration.

### Definitions

*Dwellings* – For census purposes, dwellings are divided into two groups: occupied and unoccupied. Occupied dwellings can be either private or non-private whilst the unoccupied belong to the private category.

- (i) An occupied private dwelling is defined as the premises occupied by a household on census night (for definition of *household* see below). A *private dwelling* is normally a house, room or flat but can also be a tent, houseboat, or caravan if standing on its own block of land and not occupied by members of the same household resident in an adjacent dwelling. It is important to remember that the census definition of a private dwelling means that the total number of dwellings may be more than the total number of known dwelling structures in any given area (see *Household* below). *Non-private dwellings* are hotels, motels, hostels, boarding houses, gaols, religious and charitable institutions, defence establishments and other communal dwellings. Usually the occupants of such dwellings use communal facilities (such as hotel dining rooms or mess halls) attached to the particular establishment. A caravan situated in a caravan park (whether

permanently or temporarily) is treated as part of a non-private dwelling as are self-contained units provided by commercial enterprises such as hotels, motels and guest-houses.

- (ii) An unoccupied dwelling is a structure built specifically for living purposes and capable of being lived in but unoccupied at the time of the census. Vacant houses, holiday houses, huts, cabins (other than seasonal workers' quarters) and houseboats are counted as unoccupied dwellings but vacant tents, garages and caravans (if not normally occupied) are not. Also included are dwellings vacant because they have been newly completed, vacant for demolition or repair, dwellings to let and dwellings where all members of the household were absent on census night.

**Household** – For census purposes, a household is either a person living alone or a group of people living together as a single domestic unit with common eating arrangements. It is therefore possible for more than one household to live in one house or other dwelling structure. For example, a lodger who lives with a family and provides all his own food is not a member of the family's household but constitutes a separate household and therefore completes a separate householder's schedule. As an occupied private dwelling is defined as the premises occupied by a household on census night (see above), the number of households and the number of occupied private dwellings is identical. It is possible therefore for the number of occupied private dwellings, as defined for census purposes, in an area to be greater than the known number of dwelling structures.

**Migratory** – People enumerated on board vessels in or between Australian ports, or on board long-distance trains, buses or aircraft are classified as Migratory. Such people are not included in the population of specific LGA's, but are shown as a balancing item in the population of a State or Territory. By definition, there is no Migratory population in the Australian Capital Territory.

**Campers Out** – People who spent census night in the open in cars, caravans or trucks pulled up at the side of the road for that night only, or people in other temporary camps or accommodation erected for that night only are classified as campers out. Such people are included in the population of the LGA in which they were enumerated.

#### Geographical Areas

Information from the census is available at various levels of geographical detail. Information at other levels may be made available on request. Some of the principal levels are described below:

#### Collection District (CD) –

The CD is the smallest geographical area used in the collection and dissemination of census data. A CD is an area containing approximately 300 dwellings in urban areas and fewer in rural areas.

#### Local Government Area (LGA) –

This is the principal tabulation unit used in the publication of census data. LGA's correspond in all but a few instances to legal Local Government Authority areas as defined at 31 January 1976.

#### Statistical Division –

Statistical Divisions are designed to be reasonably homogeneous regions characterised by identifiable social and economic links between the inhabitants and between the economic units within the region, under the unifying influence of one or more major towns or cities.

#### Statistical Subdivision –

Statistical Subdivisions are delineated in most States on the same basis as Statistical Divisions but as portions of the latter.

#### Statistical District –

Statistical Districts have been delineated in respect of urban centres with a population of 25,000 or more, using concepts and criteria similar to those for Capital City Statistical Divisions.

#### Section of State

This identifies geographic areas, which are aggregations of CD's, on a basis which ignores legal boundaries. Section of State boundaries are drawn for statistical purposes only and the components of each Section within a State or Territory are generally not necessarily contiguous.

Five sections of State are recognised:

- (i) Major Urban – Urban Centres with a population of 100,000 or more.
- (ii) Other Urban – Urban Centres with a population of 1,000 to 99,999.
- (iii) Bounded Rural Locality – Population clusters of 200 - 999
- (iv) Rural Balance.
- (v) Migratory (see above for definition).

The urban centres designated as Major Urban at the 1976 Census are:

- N.S.W. – Sydney, Newcastle, Wollongong,  
Canberra (part), Gold Coast (part)  
Vic. – Melbourne, Geelong  
Qld – Brisbane, Gold Coast (part)  
S.A. – Adelaide  
W.A. – Perth  
Tas. – Hobart  
A.C.T. – Canberra (part)

**APPENDIX A**

**TABLE CONTENT**

Most of the tables are self-explanatory. The following notes are designed to explain specific elements of some tables.

**TABLES 16,17,25,38,39,44,66,67**

These tables each contain data on highest qualifications obtained.

- (i) NO QUALIFICATION includes only those people aged 15 years or more, who had not obtained a qualification since leaving school.
- (ii) NOT STATED includes people who did not answer the question and people who, having indicated they had obtained a qualification since leaving school, did not state any details.

**TABLE 18**

Data in this table were based on information supplied by respondents. Despite efforts made to eliminate inconsistencies in the data by editing and quality control procedures some apparent inconsistencies appear in the table. For example, some adults studying part-time indicated they were attending SCHOOL and some children under 15 years of age indicated that they were attending OTHER INSTITUTIONS.

**TABLES 45-50**

These tables contain information on either families or family heads. For each household it is possible to determine, through the relationship of each person to the household head, both the number of families in each household and the heads of those families.

The publication *Making Sense of the Census* (2129.0) refers to the sample processing of the 1976 Census and the use of a raising factor to estimate the total number of people and dwellings. A factor is applied to the count of people obtained from the sample processing to estimate the total number of people; a different factor is applied to the sample counts of dwellings.

Although dwelling information is usually arrived at by using the dwelling factor, sometimes it is necessary to use the person factor. Similarly, it is sometimes necessary to apply the dwelling factor when calculating the estimate relating to characteristics of people. Consequently, different figures are likely to occur for the same items of information. The difference however, is not significant.

In Tables 45 to 50 the figures relating to dwellings and families have been derived using the person factor.

**TABLES 60-70**

The occupation classification used gives data for each major and minor occupational group. Details of the full classification are contained in *Information Paper No. 9 (iii)* (2114.0). Due to space limitations some major and minor occupational group headings have been abbreviated. The following is a full listing:

## ABBREVIATIONS USED IN THE TABLES

ADMIN	Administration
AGRIC, FOREST, FISH, HUNT	Agriculture, Forestry, Fishing and Hunting
ATTEND	Attending
CAE'S	Colleges of Advanced Education
CHLDN	Children
CLASS	Classifiable
COACH	Coaching
C'WEALTH	Commonwealth
EDUC	Educational
EDUC INST	Educational Institutions

## CLASSIFICATION OF OCCUPATIONS

### SUMMARY

#### *Major and Minor Occupation Groups*

#### **0: PROFESSIONAL, TECHNICAL AND RELATED WORKERS**

Architects, Engineers and Surveyors, Professional  
Chemists, Physicists, Geologists and Other Physical Scientists  
Biologists, Veterinarians, Agronomists and Related Scientists  
Medical Practitioners and Dentists  
Nurses, including Probationers or Trainees  
Professional Medical Workers, n.e.c.  
Teachers  
Clergy and Related Members of Religious Orders  
Law Professionals  
Artists, Entertainers, Writers and Related Workers  
Draftsmen and Technicians, n.e.c.  
Other Professional, Technical and Related Workers

#### **1: ADMINISTRATIVE, EXECUTIVE AND MANAGERIAL WORKERS**

Administrative and Executive Officials, Government, n.e.c.  
Employers, Workers on Own Account, Status 0, Directors, Managers, n.e.c.

#### **2: CLERICAL WORKERS**

Book-keepers and Cashiers  
Stenographers and Typists  
Other Clerical Workers

#### **3: SALES WORKERS**

Insurance, Real Estate Salesmen, Auctioneers and Valuers  
Commercial Travellers and Manufacturers Agents  
Proprietors and Shopkeepers, Workers on Own Account, n.e.c., Status 0, Retail and  
Wholesale Trade, Salesmen, Shop Assistants and Related Workers

#### **4: FARMERS, FISHERMEN, HUNTERS, TIMBER GETTERS AND RELATED WORKERS**

Farmers and Farm Managers  
Farm Workers, including Farm Foremen  
Wool Classers  
Hunters and Trappers  
Fishermen and Related Workers  
Timber Getters and Other Forestry Workers

#### **5: MINERS, QUARRYMEN AND RELATED WORKERS**

Miners, Mineral Prospectors and Quarrymen  
Well Drillers, Oil, Water and Related Workers  
Mineral Treaters

#### **6: WORKERS IN TRANSPORT AND COMMUNICATION**

Deck and Engineer Officers, Ship, not Services  
Deck and Engine Room Hands, Ship and Boatmen, not Services  
Aircraft Pilots, Navigators and Flight Engineers, not Services  
Drivers and Firemen, Rail Transport  
Drivers, Road Transport  
Guards and Conductors, Railway  
Inspectors, Supervisors, Traffic Controllers and Despatchers, Transport  
Telephone, Telegraph and Related Telecommunication Operators  
Postmasters, Postmen and Messengers  
Workers in Transport and Communication, n.e.c.

Classification of Occupations – *continued*  
Summary – *continued*

*Major and Minor Occupation Groups*

**7/8: TRADESMEN, PRODUCTION-PROCESS WORKERS AND LABOURERS,**

**N.E.C.**

Spinners, Weavers, Knitters, Dyers and Related Workers  
Tailors, Cutters, Furriers and Related Workers  
Leather Cutters, Lasters, Sewers (except Gloves and Garments) and Related Workers  
Furnacemen, Rollers, Drawers, Moulders and Related Metal Making and Treating Workers  
Precision Instrument Makers, Watchmakers, Jewellers and Related Workers  
Machine Toolmakers, Metal Machinists, Mechanics, Plumbers and Related Metal Workers  
Electricians and Related Electrical and Electronic Workers  
Metal Workers, Metal and Electrical Production-Process Workers, n.e.c.  
Carpenters, Woodworking Machinists, Cabinetmakers and Related Workers  
Painters and Decorators  
Bricklayers, Plasterers and Construction Workers, n.e.c.  
Compositors, Printing Machinists, Engravers, Bookbinders and Related Workers  
Potters, Kilnmen, Glass and Clay Formers and Related Workers  
Millers, Bakers, Butchers, Brewers and Related Food and Drink Workers  
Chemical, Sugar and Paper Production-Process Workers  
Tobacco Preparers and Tobacco Product Makers  
Paper Products, Rubber, Plastic and Production-Process Workers, n.e.c.  
Packers, Wrappers, Labellers  
Stationary Engine, Excavating and Lifting Equipment Operators  
Storemen and Freight Handlers  
Labourers, n.e.c.  
Apprentices, Factory Workers, Foremen, Machinists, (so described), n.e.c.

**9: SERVICE, SPORT AND RECREATION WORKERS**

Fire Brigade, Police and Other Protective Service Workers  
Housekeepers, Cooks, Maids and Related Workers  
Waiters, Bartenders  
Caretakers, Cleaners, Buildings  
Barbers, Hairdressers and Beauticians  
Launderers, Dry Cleaners and Pressers  
Athletes, Sportsmen and Related Workers  
Photographers and Camera Operators  
Undertakers and Crematorium Workers  
Service, Sport, Recreation Workers, n.e.c.

**10: MEMBERS OF ARMED SERVICES**

Members of Armed Services in Australia

**11: OCCUPATION INADEQUATELY DESCRIBED OR NOT STATED**

Occupation Inadequately Described or Not Stated

# INDUSTRY CLASSIFICATION SUMMARY

## DIVISION AND SUBDIVISION

### A : Agriculture, Forestry, Fishing and Hunting

Agriculture, Forestry, Fishing and Hunting  
Undefined  
Agriculture  
Services to Agriculture  
Forestry and Logging  
Fishing and Hunting

### B : Mining

Mining undefined  
Metallic minerals  
Coal  
Crude Petroleum (including Natural Gas)  
Construction materials  
Other Non-metallic minerals  
Services to mining

### C : Manufacturing

Manufacturing undefined  
Food, Beverages and Tobacco  
Textiles  
Clothing and Footwear (including Knitting Mills)  
Wood, Wood products and Furniture (except Sheet Metal)  
Paper and Paper products, Printing and Publishing  
Chemical, Petroleum and Coal products  
Glass, Clay and other Non-metallic mineral products  
Basic metal products  
Fabricated metal products  
Transport equipment  
Other Industrial machinery and equipment and household appliances  
Leather, Rubber and Plastic products and Manufacturing n.e.c.

### D : Electricity, Gas and Water

Electricity, Gas and Water undefined  
Electricity and Gas  
Water, Sewerage and Drainage

### E : Construction

Construction undefined  
General construction  
Special-trade contracting

### F : Wholesale and Retail trade

Wholesale and Retail Trade undefined  
Wholesale trade  
Retail trade

### G : Transport and Storage

Transport and Storage undefined  
Road transport  
Railway transport  
Water transport  
Air transport  
Other transport and storage

### H : Communication

Communication

### I : Finance, Insurance, Real Estate and Business services

Finance, Insurance, Real Estate and Business services undefined  
Finance and Investment  
Insurance  
Real Estate and Business services

### J : Public Administration and Defence

Public Administration and Defence undefined  
Public Administration  
Defence

### K : Community services

Community services undefined  
Health  
Education, Libraries, Museums and Art Galleries  
Welfare and Charitable services and Religious Institutions  
Other community services

### L : Entertainment, Recreation, Restaurants, Hotels and Personal services

Entertainment, Recreation, Restaurants, Hotels and Personal services undefined  
Entertainment and Recreational services  
Restaurants, Hotels and Clubs  
Personal services  
Private households employing staff

Non-classifiable establishments

## APPENDIX B

### SAMPLING ERRORS ASSOCIATED WITH CENSUS ESTIMATES (REVISED)

This Appendix discusses the sampling errors associated with the data from the main processing phase of the 1976 Census. Data from the preliminary processing phase is not subject to sampling errors because all schedules were included. Unlike the preliminary data, the final data from the main processing phase is based on the processing of all census schedules from non-private dwellings, all schedules from the Northern Territory and a 50% sample of private dwellings in the other States and the A.C.T. Any estimate for the Northern Territory from either the preliminary or main processing phase is not subject to sampling error since all schedules for the Northern Territory were processed. Counts of the total number of males, total number of females and total number of persons for a CD or LGA from the final processing phase were constrained to agree with those from the preliminary processing phase. Therefore, these estimates of total are not subject to sampling error.

#### WHAT IS SAMPLING ERROR

Since only a 50% sample of private dwelling schedules was processed, it is likely that the estimates derived from the census would differ from figures which would have been obtained if all schedules were included. These differences are called sampling errors. The sampling error associated with any estimate can be estimated from the sample results and one measure so derived is the standard error. The particular 50% sample selected was one of a large number of possible 50% samples. Each possible 50% sample would have yielded different estimates. The standard error measures the variation of all the possible 50% sample estimates around the figures which would have been obtained if all schedules had been processed.

Given an estimate and the standard error on that estimate, there are about two chances in three that the sample estimate will differ by less than one standard error from the figure that would have been obtained if all schedules had been processed, and about nineteen chances in twenty that the difference will be less than two standard errors.

Another measure of the sampling error is the relative standard error, which is obtained by expressing the standard error as a percentage of the estimate; that is

$$\text{Relative Standard Error} = \frac{\text{Standard Error}}{\text{Estimate}} \times 100$$

Both standard error and relative standard error are used in the following discussion of the reliability of the estimates. An example of their application is as follows:

#### Example

If an estimate of 70 has a relative standard error of 10%, then the standard error of that estimate is 10% of 70 or 7. Thus there are two chances in three that the figure that would have been obtained if all schedules had been processed will be in the range  $70 \pm (1 \times 7)$  or 63 to 77, and nineteen chances in twenty that this figure is between  $70 \pm (2 \times 7)$  or 56 to 84.

An estimate of less than 10 persons or dwellings should be treated with caution as it will be subject to such high sampling error (relative standard error generally in excess of 40%), as to detract seriously from its value for most reasonable uses.

#### PRESENTATION OF SAMPLING ERRORS

It would have been impracticable to publish standard errors of all census estimates because difficulties in presentation would have been encountered with the large number of estimates. In addition, computer production of all standard errors would have been costly.

Consequently, graphs and tables which relate the relative standard error of an estimate to the size of the estimate are given at the end of this Appendix. As can be seen from the graphs, the larger an estimate the greater its reliability and thus the smaller the relative standard error. The graphs are not intended to give a precise measure of the error for a particular estimate, but provide an indication of the likely magnitude of the relative standard error for estimates of any particular size.

## HOW TO DETERMINE THE SAMPLING ERROR ON AN ESTIMATE

There is no sampling error on an estimate if

- the estimate is total males, total females or total persons in a CD, LGA or aggregations of these areas.
- the estimate relates to the Northern Territory.

If the estimate is greater than 1000 persons or dwellings, then the relative standard error will be less than 2.5% and so the sampling error can be assumed to be negligible for most practical purposes.

The relative standard error or standard error for any other estimate may be found by reference to the graphs and tables given at the end of this Appendix. A complete description of the methods to be used to obtain the relative standard error for any estimate is given in the following sections.

## SAMPLING ERRORS ON DWELLING AND PERSON ESTIMATES

Sampling errors depend on the type of estimate concerned.

1. For dwelling estimates the relative standard errors are given by LINE D (refer GRAPH 1).
2. For person estimates refer to GRAPH 2. Sampling errors on person estimates depend on the particular topic of interest. Two groups of topics have been identified:

- Use LINE A if the estimate involves any of the following topics:

Year of arrival; period of residence; birthplace (if overseas); country of citizenship (if overseas); religion; languages regularly used; racial origin.

- Use LINE B for all other topics related to persons.

The difference between the relative standard errors for different person estimates arises because some characteristics are generally similar for persons in the same dwelling, but differ from persons in different dwellings. That is these characteristics are clustered by dwelling (for example, religion and racial origin). The sampling scheme used involved the inclusion of ALL persons in selected dwellings rather than selection of every second person in a dwelling. Hence for characteristics which are clustered by dwelling there is a greater chance that such persons would have been either undersampled or oversampled. Thus estimates of number of persons classified by characteristics which are clustered by dwelling will have somewhat higher relative standard errors.

If an estimate is known to include a large number of persons from non-private dwellings where all schedules were processed (for example an estimate of males ten to fifteen years of age in a CD with a large boarding school for boys), then the relative standard error as read from the graph will overestimate the true relative standard error.

### Example

Consider an estimate of the number of female university graduates in an LGA. The relative standard error will be derived from LINE B of GRAPH 1. If the estimated number of female university graduates in the LGA is 50, then reading from this line, the relative standard error is approximately 12%. The standard error on the estimate is  $50 \times 12/100 = 6$ . Therefore, there are nineteen chances in twenty that the number of female university graduates in the LGA is in the range  $30 \pm (2 \times 6)$  or 18 to 42.

Relative standard errors for dwelling and person estimates may also be determined from Table 1 which sets out relative standard errors for selected estimate sizes.

## SAMPLING ERRORS ON ESTIMATES OF PROPORTIONS AND PERCENTAGES

Proportions and percentages formed from the ratio of two census estimates are also subject to sampling errors. The size of the error depends on the accuracy of both the numerator and the denominator. The formula for the relative standard error of a proportion is given below.

### Relative Standard Error (x/y)

$$\Rightarrow \sqrt{\{\text{Relative Standard Error (x)}\}^2 - \{\text{Relative Standard Error (y)}\}^2}$$

The relative standard error on a percentage is the same as for the corresponding proportion. Thus the relative standard error on an estimate of 58% is the same as that on the proportion 0.58.

### Example

Consider an estimate of the labour force participation rate for persons born overseas for a particular LGA. If the number of persons born overseas who are in the labour force is 100 and the total number of persons born overseas is 160, then the estimated proportion is  $100/160 = 0.63$ . The relative standard errors for both the numerator and denominator will be derived from GRAPH 2 LINE A. Reading from this line, the relative standard error of the numerator (i.e. the number of persons born overseas who are in the labour force) is approximately 14%, and the relative standard error of the denominator (i.e. the number of persons born overseas) is approximately 11%. The relative standard error of the estimate of the proportion is therefore

$$\sqrt{14^2 - 11^2} = 8.6\%$$

The standard error on the proportion is  $8.6 \times 0.63/100 = 0.05$ . Therefore, there are nineteen chances in twenty that the labour force participation rate for persons born overseas for the LGA is in the range  $0.63 \pm (2 \times 0.05)$  or 0.53 to 0.73.

As can be seen from the above formula, the relative standard error of a proportion or percentage will always be less than the relative standard error of the numerator. However, whenever a proportion or percentage is small (i.e. the denominator considerably greater than the numerator), it will be reasonable to approximate the relative standard error of the proportion or percentage by the relative standard error of the numerator.

For proportions or percentages where the denominator is the total number of males, females or persons in a CD or group of CDs, the relative standard error of the denominator is zero because these totals were derived from the preliminary processing phase. In these cases, the relative standard error of the proportion or percentage is given simply by the relative standard error of the numerator.

### Example

Consider an estimate of the percentage of persons born overseas for a particular CD. If the number of persons born overseas in the CD is 300 and the total number of persons in the CD is 1000, then the estimated percentage is  $(300/1000) \times 100 = 30\%$ . The relative standard error on the denominator is zero since estimates of total persons in a CD are not subject to sampling error. The relative standard error on the numerator can be obtained from GRAPH 2 LINE A. This graph gives the relative standard error on the numerator as approximately 8.1%. Therefore, the relative standard error on the percentage is also 8.1% and hence the standard error on the estimate of percentage is  $8.1 \times 30/100 = 2.5$  percentage points. Therefore, there are nineteen chances in twenty that the percentage of persons born overseas in the CD will lie within the range  $30 \pm (2 \times 2.5)$  or 25% to 35%.

Relative standard errors for estimates of proportions or percentages may also be determined from Table 2 which sets out relative standard errors for selected percentages or proportions.

## SAMPLING ERRORS ON ESTIMATES OF DIFFERENCES

The relative standard error on differences between two estimates of numbers or between two estimates of proportions (or percentages) can also be derived from the graphs of relative standard errors.

1 For differences between estimates from the 1976 Census and those from the 1971 Census, the standard error of the difference will be identical to the standard error of the 1976 estimate alone, since 1971 estimates are not subject to sampling error.

### Example

If estimates for the 1971 and 1976 Censuses are 500 dwellings and 800 dwellings respectively, then the difference is estimated as 300 dwellings. The 1971 estimate has no relative standard error, whilst the 1976 estimate has a relative standard error (as read from GRAPH 1) of approximately 3% and hence a standard error of 3% of 800 or 24. The standard error of the difference is 24 and there are nineteen chances in twenty that if all schedules from the 1976 Census had been processed, the observed difference would be within the range  $300 \pm (2 \times 24)$  or 252 to 348.

2 For differences between two 1976 Census estimates the standard error of the difference may be approximated by the following formula:

$$\text{Standard Error (z-y)} = \sqrt{\{\text{Standard Error (z)}\}^2 + \{\text{Standard Error (y)}\}^2}$$

This approximation will be exact for differences between estimates of the same characteristic in two different areas (e.g. LGAs, CDs), or for differences between separate and uncorrelated characteristics in the same area. If, however, there is positive correlation between the characteristics (e.g. comparison of number of lawyers with number of persons with law degrees), the above approximation will overestimate the true standard error. If there is a negative correlation between the characteristics (e.g. comparison of the percentage of persons who travel to work by train and by car), it will underestimate the true standard error.

### Example

If the estimates for two LGAs of the total number of occupied dwellings are 1000 and 800 and the number of occupied dwellings with outer walls of brick are 250 and 650 respectively, then the percentage of occupied dwellings with brick walls in each of these LGAs is  $(250/1000) \times 100 = 25\%$  and  $(650/800) \times 100 = 81.2\%$  respectively. The difference between these estimated percentages is therefore 56.2%. The calculation of the standard error of this difference requires the standard error of each of the percentages to be calculated. The relative standard errors on each of the estimates of numbers (1000, 800, 250 and 650) can be derived from GRAPH 1 LINE D. Using the formula given in the previous Section, the relative standard errors on each of the percentages are:

$$\sqrt{6.0^2 - 3.0^2} = 5.2\% \text{ and } \sqrt{3.7^2 - 3.3^2} = 1.7\%.$$

The standard errors on each of the percentages are

$$5.2 \times 25/100 = 1.3 \text{ and } 1.7 \times 81.2/100 = 1.4.$$

Finally, the standard error on the difference is

$$\sqrt{1.3^2 + 1.4^2} = 1.9 \text{ percentage points.}$$

Therefore, there are nineteen chances in twenty that the difference between the percentage of occupied dwellings with brick walls in the different LGAs will be within the range  $56.2 \pm (2 \times 1.9)$  or 52.4 to 60.0%.

- ☐ Yes  
or  
☐ No → Go to question 3

How many dwelling units are there in the whole building?

- |               |                            |                        |                            |
|---------------|----------------------------|------------------------|----------------------------|
| 2 units ..... | <input type="checkbox"/> 1 | 6-8 units .....        | <input type="checkbox"/> 5 |
| 3 units ..... | <input type="checkbox"/> 2 | 9-16 units .....       | <input type="checkbox"/> 6 |
| 4 units ..... | <input type="checkbox"/> 3 | 17-32 units .....      | <input type="checkbox"/> 7 |
| 5 units ..... | <input type="checkbox"/> 4 | 33 or more units ..... | <input type="checkbox"/> 8 |

## 3. Was this dwelling built after 30 June 1971?

Yes ☐ or No ☐

## 4. What is the material of the outer walls of this building?

- Tick one box only. If more than one, indicate main material.
  - Brick, brick veneer .....
  - Stone .....
  - Concrete, concrete block .....
  - Timber .....
  - Metal .....
  - Fibro, asbestos .....
  - Other .....
- Please describe .....

## 5. What is the main source of water supply within this dwelling?

- Tick one box only.
- Piped from mains .....
- Piped from rain water tank .....
- Piped from other source .....
- No piped water within this dwelling .....

## 6. What is the method of sewage disposal for this dwelling?

- Flush toilet connected to public sewer .....
- Flush toilet connected to individual system, e.g. septic tank .....
- Sanitary pan collection .....
- Other .....

## 7. What fuel or power do you mostly use for the following household purposes?

- Tick one box in each of the four columns.

	Cooking	Lighting	Living room heating	Bathroom water heating
Coal, coke or briquettes	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Wood	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Electricity	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Gas — i) mains	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
ii) bottled or L.P.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Oil (including kerosene)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Solar energy	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Other fuel	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
No fuel used	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

## 8. How many registered motor vehicles owned or used by members of this household were garaged or parked at or near this dwelling for the night of 30 June 1976?

- Exclude motor bikes, motor scooters, tractors.
- Include company vehicles kept at home.
- None      1      2      3      4 or more
- ☐      ☐      ☐      ☐      ☐

## 9. Is this dwelling situated on a holding of a hectare (2½ acres) or more which is used mainly for agricultural or pastoral purposes?

- That is for any type of crop growing, animal or poultry farming.

Yes ☐ or No ☐

## 10. How many rooms are there in this dwelling?

- Write the number of each type of room.
- Count each room once only.
- Except for kitchens and bathrooms, a room shared with another household should be counted only by the principal householder.
- Do not count toilets, pantries, laundries, storerooms, halls or corridors.

Type of Room:

	Number
Bedroom(s) .....	<input type="text"/>
Permanently enclosed sleepout(s) .....	<input type="text"/>
Bedsitting room .....	<input type="text"/>
Combined lounge/dining room .....	<input type="text"/>
Dining room .....	<input type="text"/>
Lounge .....	<input type="text"/>
Kitchen — used only by this household .....	<input type="text"/>
Kitchen — shared with another household .....	<input type="text"/>
Bathroom — used only by this household .....	<input type="text"/>
Bathroom — shared with another household .....	<input type="text"/>
Family room .....	<input type="text"/>
Study .....	<input type="text"/>
Business office .....	<input type="text"/>
Other rooms .....	<input type="text"/>

1976 CENSUS OF POPULATION AND HOUSING

POPULATION AND DWELLINGS: CROSS-CLASSIFIED TABLES  
(2418.0 - 2426.0) CORRIGENDA:

TABLE 18

Table 18 which shows the number of people attending educational institutions by the type of institution has been found to be in error. The number of persons attending schools and other institutions has been understated by persons who said they attended a school or other institution but did not state the name of the institution (ie type of institution was not stated). Revised figures of persons attending schools and other institutions can be obtained from offices of the Bureau.
